SUMMARY

AI Engineer with hands-on experience building LLM-based AI agents, backend systems, and automation pipelines for production applications. Strong background in Python, TypeScript, Node.js, API-driven architectures, and AI workflow orchestration using n8n. Experienced in integrating AI capabilities into scalable systems, including structured AI integrations using the Model Context Protocol (MCP).

TECHNICAL SKILLS

AI & ML: LLM-based agents, prompt engineering, AI workflow orchestration

AI Infrastructure: Model Context Protocol (MCP), vector databases, n8n, Supabase, Vercel AI SDK

Back-end: Python, Node.js, JavaScript, TypeScript, SQL, RESTful APIs

Frameworks: Next.js, React

Tools: Git, Cursor, relational databases

EXPERIENCE

Shiftcare - AI Engineer

May 2026 - Present

THEOSYM - AI Engineer / Back-end Developer

Nov 2024 - January 2026 | Full-time

- Designed and optimized scalable backend systems and APIs supporting AI-driven, full-stack applications.
- Implemented full-stack features with Next.js and React, consuming RESTful APIs and AI-powered services, with Supabase for authentication and database management.
- Developed and deployed LLM-based AI agents using prompt engineering and structured context management.
- Implemented AI integrations using the Model Context Protocol (MCP) to enable consistent and maintainable LLM context handling.
- Built AI automation pipelines using n8n, reducing manual operational processes and improving efficiency.
- Integrated AI-powered services into production systems through RESTful APIs using Python and Node.js backends.

EDUCATION

University of the Cordilleras

Bachelor of Science in Information Technology (Major in Network and Security) | 2022 - 2026

CERTIFICATIONS

Technical Support Fundamentals • The Bits and Bytes of Computer Networking
